## Native Deciduous Shrubs

(Collected)

Collected Native Shrubs and tree seedlings from this district have been marketed for over a half century, and we find that a demand for this material has increased each year we have been in business. Our continued shipments have given satisfaction and we are offering many items not to be had from cultivated stock at reasonable prices. Please consider this as well as the fact that we have had a lifetime experience in this line.

On account of the drouth here this summer and the shortage in labor we are unable to offer you our usual line of nursery-grown stock. About all the nursery-grown stock we can offer in this list is lining-out sizes. Therefore, to keep our many friends and customers from being disappointed we are offering a variety of our native collected stock.

On the covers of this list you will see the photographs of the AZALEA CALENDULACEA and the ROSE ACACIA. These are two of our most beautiful shrubs and the demand for these plants is always good. Therefore, if you intend to order some of these plants we advise you to place your order early, as orders are filled in rotation. Ordering early will assure you of getting your shipment which, later, might be impossible for us to fill and would cause you disappointment.

Our shipping season opens October 15.
